Appendix D: List Sampling Frame Coverage Study	21

INTRODUCTION

The Annual Synar Report (ASR) format provides the means for States to comply with the reporting provisions of the Public Health Service Act (42 U.S.C. 300x-26) and the Tobacco Regulation for the SAPT Block Grant (45 C.F.R. 96.130 (e)).

Public reporting burden for the collection of information is estimated to average 15 hours for Section I and 3 hours for Section II, including the time for reviewing instructions, completing and reviewing the collection of information, searching existing data sources, and gathering and maintaining the data needed. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to SAMHSA Reports Clearance Officer; Paperwork Reduction Project; 1 Choke Cherry Road, 7th Floor Rockville, Maryland 20857.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0930-0222 with an expiration date of 10-31-2010.

How the Synar report helps the Center for Substance Abuse Prevention

In accordance with the tobacco regulations, States are required to provide detailed information on progress made in enforcing youth tobacco access laws (FFY 2008 Compliance Progress) and future plans to ensure compliance with the Synar requirements to reduce youth tobacco access rates (FFY 2009 Intended Use Plan). These data are required by 42 U.S.C. 300x-26 and will be used by the Secretary to evaluate State compliance with the statute. Part of the mission of the Center for Substance Abuse Prevention (CSAP) is to assist States 1 by supporting Synar activities and providing technical assistance helpful in determining the type of enforcement measures and control strategies that are most effective. This information is helpful to CSAP in improving technical assistance resources and expertise on enforcement efforts and tobacco control program support activities, including State Synar Program support services, through an enhanced technical assistance program involving conferences and workshops, development of training materials and guidance documents, and on-site technical assistance consultation.

How the Synar report can help States

The information gathered for the Synar report can help States describe and analyze sub-State needs for program enhancements. These data can also be used to report to the State legislature and other State and local organizations on progress made to date in enforcing youth tobacco access laws when aggregated statistical data from State Synar reports can demonstrate to the Secretary the national progress in reducing youth tobacco access problems. This information will also provide Congress with a better understanding of State progress in implementing Synar, including State difficulties and successes in enforcing retailer compliance with youth tobacco access laws.

¹The term State is used to refer to all the States and territories required to comply with Synar as part of the Substance Abuse Prevention and Treatment Block Grant Program requirements (42 U.S.C. 300x-64 and 45 C.F.R. 96.121).

Getting assistance in completing the Synar report

If you have questions about programmatic issues, you may call CSAP's Division of State Programs at (240) 276-2413 and ask for your respective State Project Officer, or contact your State Project Officer directly by telephone or e-mail using the directory provided in the FY 2009 Uniform Application, Appendix A. If you have questions about fiscal or grants management issues, you may call the Grants Management Officer, Office of Program Services, Division of Grants Management, at (240) 276-1422.

Where and when to submit the Synar report

The Annual Synar Report (ASR) must be received by SAMHSA no later than December 31, 2008. The ASR must be submitted in the **approved OMB report format**. Use of the approved format will avoid delays in the review and approval process. The chief executive officer (or an authorized designee) of the applicant organization must sign page 1 of the ASR certifying that the State has complied with all reporting requirements.

The State must upload one copy of the report using the online Web BGAS (Block Grant Application System). States that use the Synar Survey Estimation System (SSES) must also upload one copy of SSES Tables 1-5 (in Excel) to Web BGAS. States that do not use SSES must upload one copy of ASR Forms 1, 4 and 5, and Forms 2 and 3, if applicable, (in Excel format) to Web BGAS. Instructions on how to access the Web BGAS system are included in the attached cover letter.

Additionally, the State must submit one signed original of the report (including the signed Funding Agreements/Certifications), as well as one additional copy of the signed Funding Agreements/Certifications, to the Grants Management Officer at the address below:

Ms. Barbara Orlando
Grants Management Officer
Office of Program Services
Division of Grants Management
Substance Abuse and Mental Health Services Administration

FFY 2009: FUNDING AGREEMENTS/CERTIFICATIONS

The following form must be signed by the Chief Executive Officer or an authorized designee and submitted with this application. Documentation authorizing a designee must be attached to the application.

PUBLIC HEALTH SERVICES ACT AND SYNAR AMMENDMENT

42 U.S.C. 300x-26 requires each State to submit an annual report of its progress in meeting the requirements of the Synar Amendment and its implementing regulation (45 C.F.R. 96.130) to the Secretary of the Department of Health and Human Services. By signing below, the chief executive officer (or an authorized designee) of the applicant organization certifies that the State has complied with these reporting requirements and the certifications as set forth below.

SYNAR SURVEY SAMPLING METHODOLOGY

The State certifies that the Synar survey sampling methodology on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2009 is up-to-date and approved by the Center for Substance Abuse Prevention.

SYNAR SURVEY INSPECTION PROTOCOL

The State certifies that the Synar Survey Inspection Protocol on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2009 is up-to-date and approved by the Center for Substance Abuse Prevention.

State: North Dakota				
Name of Chief Executive Officer or Designee: Carol K. C	Olson			
Signature of CEO or Designee:				
Title: Executive Director, ND Dept. of Human Services	Date Signed:			
If signed by a designee, a copy of the designation must be attached.

Date: <u>11/24/2008</u>

SECTION I: FFY 2008 (Compliance Progress)

YOUTH ACCESS LAWS, ACTIVITIES, AND ENFORCEMENT

42 U.S.C. 300x-26 requires the States to report information regarding the sale/distribution of tobacco products to individuals under age 18.

1.	Please indicate any changes or additions to the State tobacco statute(s) relating to youth access since the last reporting year. Please attach a photocopy of the change(s) in the State law(s) if any was made since the last reporting year (see 42 U.S.C. 300x-26).				
	a.	Has there been a change in the minimum sale age for tobacco products?			
		☐ Yes ⊠ No			
		If Yes, current minimum age: 19 20 21			
	b.	Have there been any changes in State law that impact the State's protocol for conducting Synar inspections? \square Yes \boxtimes No			
		If Yes, indicate change. (Check all that apply.)			
		☐ Changed to require that law enforcement conduct inspections of tobacco outlets ☐ Changed to make it illegal for youth to possess, purchase or receive tobacco			
		☐ Changed to require ID to purchase tobacco			
		Other change(s) (Please describe.)			
	c.	Have there been any changes in the law concerning vending machines?			
		☐ Yes ⊠ No			
		If Yes, indicate change. (Check all that apply.)			
		☐ Total ban enacted			
		☐ Banned from location(s) accessible to youth			
		Locking device or supervision required			
		Other change(s) (Please describe.)			
	d.	Have there been any changes in State law that impact the following?			
		Licensing of tobacco vendors			
		Penalties for sales to minors			
2.	42 U.S.C	e how the Annual Synar Report (see 45 C.F.R. $96.130(e)$) and the State Plan (see C. $300x-51$) were made public within the State prior to submission of the ASR.			
	(Check o	all that apply.)			
		Placed on file for public review			
		Posted on a State agency Web site (<i>Please provide exact Web address.</i>) p://www.nd.gov/dhs/info/pubs/abuse.html			

		Notice published in a newspaper or newsletter Public hearing
		Announced in a news release, a press conference, or discussed in a media interview
		•
		Distributed for review as part of the SAPT Block Grant application process
		Distributed through the public library system
		Published in an annual register
		Other change(s) (Please describe.)
3.	Identify	the following agency or agencies (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).
	a.	The State agency(ies) designated by the Governor for oversight of the Synar requirements:
		ND Department of Human Services, Division of Mental Health & Substance Abuse Services
		Has this changed since last year's Annual Synar Report? Yes No
	b.	The State agency(ies) responsible for conducting random, unannounced Synar inspections:
		ND Department of Human Services, Division of Mental Health & Substance Abuse Services
		Has this changed since last year's Annual Synar Report? Yes No
	c.	The State agency(ies) responsible for enforcing youth tobacco access law(s):
		ND Office of the Attorney General (on a statewide basis), but enforcement generally takes place at the local level (see Question 5a)
		Has this changed since last year's Annual Synar Report? Yes No
4.	Identify	the State agency(ies) responsible for tobacco prevention activities.
	•	artment of Health
	*	•
	Ha	s the responsible agency changed since last year's Annual Synar Report?
		Yes No
	a.	Describe the coordination and collaboration that occur between the agency responsible for tobacco prevention and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies
		Are the same
		☐ Have a formal written memorandum of agreement
		Have an informal partnership
		□ Conduct joint planning activities
		Combine resources
		Have other collaborative arrangement(s) (<i>Please describe</i> .)

5. Please answer the following questions regarding the State's activities to enforce the youth access to tobacco law(s) in FFY 2008 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130(e)).

a.	. Which one of the following describes the enforcement of youth access to			
	tobacco laws carried out in your State? (Check one category only.)			
	⊠ Enforcement is conducted exclusively by local law enforcement agencies.			
	☐ Enforcement is conducted exclusively by State agency(ies).			
	Enforcement is conducted by both local <u>and</u> State agencies.			

b. The following items concern penalties imposed for violations of youth access to tobacco laws by LOCAL AND/OR STATE LAW ENFORCEMENT AGENCIES. Please fill in the number requested. If State law does not provide

for tobacco retailer license/permit suspension or revocation, please

mark	"NA.	"
------	------	---

PENALTY	OWNERS	CLERKS	TOTAL
Number of citations issued	N/A	N/A	N/A
Number of fines assessed	20	14	34
Number of permits/licenses suspended	32		32
Number of permits/licenses revoked	0		0
Other (Please describe.) Warning	10	0	10

Number of citations issued is not available. The source report with this information includes only the final legal penalty imposed on each outlet in violation, not the number of citations with no legal ramification other than the citation itself.

c. What additional activities are conducted in your State to support enforcement and compliance with State tobacco access law(s)? (Check all that apply.)

Merchant education and/or training
☐ Incentives for merchants who are in compliance (e.g., reward and reminder)
Community education regarding youth access laws
Media use to publicize compliance inspection results
Community mobilization to increase support for retailer compliance with youth
access laws
Other activities (<i>Please list.</i>)

Briefly describe all checked activities:

Most activities in North Dakota are planned through collaborations at the local level, therefore communities plan different activities based on their level of readiness to address. Some communities have been successful in passing local ordinances to require merchant education training for all locally licensed retailers. Others require merchant and/or clerk education for any outlets failing local compliance checks. Many communities use the media to publicize their compliance inspection results. Fargo has developed one such model, taking out a full-page newspaper ad each quarter and publishing all businesses inspected by who passed and who failed. Bismarck and Minot regularly do press releases as inspections are done.

SYNAR SURVEY METHODS AND RESULTS The following questions pertain to the survey methodology and results of the Synar survey use the following questions pertain to the survey methodology and results of the Synar survey use the state to meet the requirements of the Synar Regulation in FFY 2008 (see 42 U.S.C. 30 and 45 C.F.R. 96.130). 5. Has the sampling methodology changed from the previous year? Yes No The State is required to have an approved up-to-date description of the Synar sampling methodology on file with CSAP. Please submit a copy of your Synar Survey Sampling Methodology (Appendix B). If the sampling methodology changed from the previous reporting year, these changes must be reflected in the methodology submitted. 7. Please answer the following questions regarding the State's annual random, unannounced inspections of tobacco outlets (see 45 C.F.R. 96.130(d)(2)). a. Did the State use the optional Synar Survey Estimation System (SSES) to analyze the Synar survey data? Yes No If Yes, attach SSES summary tables 1, 2, 3, 4 and 5 along with the ASR submits and go to Question 8. If No, continue to Question 7b. b. Report the weighted and unweighted Retailer Violation Rate (RVR) estimate and the standard error. Unweighted RVR Weighted RVR Standard error (s.e.) of the (weighted) RVR Fill in the blanks to calculate the right limit of the right-sided 95% confide interval. + (1.645 × Standard Error) equals Right c. Fill out Form 1 in Appendix A (Forms). (Required regardless of the sample design.) d. How were the (weighted) RVR estimate and its standard error obtained? (Check the one that applies.) Grown 2 (Optional) in Appendix A (Forms) (Attach completed Form 2.) Other (Please specify. Provide formulae and calculations or attach and exp.		d.	Are citations or warnings issued to retailers or clerks who sell to bacco to minors for inspections that are part of the Synar survey? \square Yes \boxtimes No
SYNAR SURVEY METHODS AND RESULTS The following questions pertain to the survey methodology and results of the Synar survey usy the State to meet the requirements of the Synar Regulation in FFY 2008 (see 42 U.S.C. 30, 26 and 45 C.F.R. 96.130). 5. Has the sampling methodology changed from the previous year? Yes No The State is required to have an approved up-to-date description of the Synar sampling methodology on file with CSAP. Please submit a copy of your Synar Survey Sampling Methodology (Appendix B). If the sampling methodology changed from the previous reporting year, these changes must be reflected in the methodology submitted. 7. Please answer the following questions regarding the State's annual random, unannounced inspections of tobacco outlets (see 45 C.F.R. 96.130(d)(2)). a. Did the State use the optional Synar Survey Estimation System (SSES) to analyze the Synar survey data? Yes No If Yes, attach SSES summary tables 1, 2, 3, 4 and 5 along with the ASR submits and go to Question 8. If No, continue to Question 7b. b. Report the weighted and unweighted Retailer Violation Rate (RVR) estimate and the standard error. Unweighted RVR Weighted RVR Standard error (s.e.) of the (weighted) RVR Fill in the blanks to calculate the right limit of the right-sided 95% confide interval. + (1.645 ×) = RVR Estimate plus (1.645 times Standard Error) equals Right c. Fill out Form 1 in Appendix A (Forms). (Required regardless of the sample design.) d. How were the (weighted) RVR estimate and its standard error obtained? (Check the one that applies.) Form 2 (Optional) in Appendix A (Forms) (Attach completed Form 2.) Other (Please specify. Provide formulae and calculations or attach and exp.)			If "Yes" to 5d, please describe the State's procedure for minimizing risk of bias to the survey results:
the following questions pertain to the survey methodology and results of the Synar survey up to the State to meet the requirements of the Synar Regulation in FFY 2008 (see 42 U.S.C. 30 and 45 C.F.R. 96.130). 6. 	e.	If stratification was used, did any strata in the sample contain only one outlet or cluster this year? Yes No No stratification			
		If Yes , explain how this situation was dealt with in variance estimation.			
	f.	Was a cluster sample design used? ☐ Yes ☐ No			
		If Yes , fill out and attach Form 3 in Appendix A (Forms 1–5), and a following question.	nswer the		
		If No, go to Question 7g.			
		Were any certainty primary sampling units selected this year?	☐ Yes ☐ No		
		If Yes, explain how the certainty clusters were dealt with in variance	e estimation.		
	g.	Report the following outlet sample sizes for the Synar survey.			
		The port the following outlet sumple sizes for the Synar survey.	Sample Size		
		Effective sample size (sample size needed to meet the SAMHSA precision equirement assuming simple random sampling)			
		Target sample size (the product of the effective sample size and the design effect)			
		Driginal sample size (inflated sample size of the target sample to counter the ample attrition due to ineligibility and non-completion)			
	I	Eligible sample size (number of outlets found to be eligible in the sample)			
		Final sample size (number of eligible outlets in the sample for which an inspection was completed)			
	h.	Fill out Form 4 in Appendix A (Forms 1–5).			
8.	Did the	State's Synar survey use a list frame? ⊠ Yes ☐ No			
	I f	Yes, answer the following questions about its coverage.			
	a.	The calendar year of the latest frame coverage study: CY 2007			
	b.	Percent coverage from the latest frame coverage study: <u>96.1%</u>			
	c.	Was a new study conducted in this reporting period? \square Yes	☑ No		
		If Yes , please complete Appendix D (List Sampling Frame Coverage and submit it with the Annual Synar Report.	e Study)		
	d.	The calendar year of the next coverage study planned: <u>CY 2010</u>			
9.		Synar survey inspection protocol changed from the previous yea \boxtimes No	r?		

The State is required to have an approved up-to-date description of the Synar inspection protocol on file with CSAP. Please submit a copy of your Synar Survey Inspection Protocol (Appendix C). If the inspection protocol changed from the previous year, these changes must be reflected in the protocol submitted.

- a. Provide the inspection period: From 7/7/08 To 9/30/08
- b. Provide the number of youth inspectors used in the current inspection year:

4 youth - 2 male, 2 female

NOTE: If the State uses SSES, please ensure that the number reported in 9b matches that reported in SSES Table 4, or explain any difference.

c. Fill out and attach Form 5 in Appendix A (Forms 1–5). (Not required if the State used the Synar Survey Estimation System (SSES) to analyze the Synar survey data.)

SECTION II: FFY 2009 (Intended Use):

Public law 42 U.S.C. 300x-26 of the Public Health Service Act and 45 C.F.R. 96.130 (e) (4, 5) require that the States provide information on future plans to ensure compliance with the Synar requirements to reduce youth tobacco access.

1. In the upcoming year, does the State anticipate any changes in the:

	Synar sampling methodology \square Yes \boxtimes No Synar inspection protocol \square Yes \boxtimes No
	If changes are made in either the Synar sampling methodology or the Synar inspection protocol, the State is required to obtain approval from CSAP prior to implementation of the change and file an updated Synar Survey Sampling Methodology (Appendix B) or an updated Synar Survey Inspection Protocol (Appendix C), as appropriate.
2.	Please describe the State's plans to maintain and/or reduce the target rate for Synar inspections to be completed in FFY 2009. Include a brief description of plans for law enforcement efforts to enforce youth tobacco access laws, activities that support law enforcement efforts to enforce youth tobacco access laws, and any anticipated changes in youth tobacco access legislation or regulation in the State.
	The last legislative session (January 1, 2007 – April 15, 2007) resulted in a new section to the century code eliminating the placement of tobacco vending machines where youth could access them, which took effect July 1, 2007. This was reflected in this year's Synar survey. Also included was the prohibition of selling tobacco products in a vending machine with any other type of product, other than matches.
	The Division will continue enforcement efforts in the same manner as in question five of Section I of this report. Additionally, the ND Department of Health will continue tobacco prevention and education efforts. Merchant education, community education, media use and community mobilization will continue. The North Dakota Department of Human Services will issue a press release announcing the results of the most recent Synar survey.
	Many community coalitions remain active in promoting stricter ordinances and will continue to conduct compliance checks that are tied to enforcement. These efforts have raised, and will continue to raise, awareness of youth access to tobacco.
3.	Describe any challenges the State faces in complying with the Synar regulation. (Check all that apply.)
	☐ Limited resources for law enforcement of youth access laws
	Limitations in the State youth tobacco access laws
	Limited public support for enforcement of youth tobacco access laws
	Limitations on completeness/accuracy of list of tobacco outlets
	Limited expertise in survey methodology
	Laws/regulations limiting the use of minors in tobacco inspections

Difficulties recruiting youth inspectors	
☐ Geographic, demographic, and logistical considerations in conducting inspections	
Ultural factors (e.g., language barriers, young people purchasing for their elders)	
☐ Issues regarding sources of tobacco under tribal jurisdiction	
Other challenges (Please list.)	
Briefly describe all checked challenges and propose a plan for each, or indicate the	

Generally, in North Dakota, there is very good support for tobacco issues. However, enforcement is at times more difficult. For example, there are communities who have been able to pass local ordinances relating to local licensing and penalties, but these communities have been unable to gain the support and cooperation of their local law enforcement in conducting compliance checks. At a state level, there has been more attention given to enforcement issues relating to methamphetamine use, leaving limited resources for tobacco.

State's need for TA related to each relevant challenge.

Tribes are sovereign Nations, therefore, we are unable to conduct compliance checks on the reservations without permission from tribal authorities. The Department of Health has been attempting to involve the tribes in tobacco prevention and control issues and has been successful in hiring coordinators in each tribal area. In addition, efforts have been made to create a compact with tribal authorities to tax tobacco products. At this time, one tribe has made a compact with the state.

North Dakota has 36 of 53 counties that are 'frontier,' with fewer than 6 persons per square mile. Distances, size of communities, and population dynamics affect many aspects of the issues related to decreasing use of tobacco by youth. Communities are losing young adults to outmigration. The youth/aging ratio decreases as older persons remain in their communities and as other older persons return to their roots in North Dakota to live out their retirement. Forty-eight counties have experienced net declines in population over the last two decades. Having an increasing aging population affects distribution of resources as aging adults require more and more, leaving fewer resources for youth.

APPENDIX A: Forms 1-5

FORM 1 (Required for all States not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data)

See attached SSES Tables.

Complete Form 1 to report sampling frame and sample information and to calculate the unweighted retailer violation rate using results from the current year's Synar survey inspections.

Instructions for Completing Form 1: In the top right hand corner of the form, provide the State name and reporting Federal fiscal year (FFY 2009). Provide the remaining information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

- Column 1: If stratification was used:
 - 1(a) Sequentially number each row.
 - 1(b) Write in the name of each stratum. All strata in the State must be listed.

If no stratification was used:

- 1(a) Leave blank.
- 1(b) Write "State" in the first row (indicates that the whole state is a single stratum).

Note for unstratified samples: for columns 2-5, wherever the instruction refers to "each stratum," report the specified information for the State as a whole.

- Column 2: 2(a) Report the number of over-the-counter (OTC) outlets in the sampling frame in each stratum.
 - 2(b) Report the number of vending machine (VM) outlets in the sampling frame in each stratum.
 - 2(c) Report the combined total of OTC and VM outlets in the sampling frame in each stratum.
- Column 3: 3(a) Report the estimated number of eligible OTC outlets in the OTC outlet population in each stratum.
 - 3(b) Report the estimated number of eligible VM outlets in the VM outlet population in each stratum.
 - 3(c) Report the combined total estimated number of eligible OTC and VM outlets in the total outlet population in each stratum.

The estimates for Column 3 can be obtained from the Synar survey sample as the weighted sum of eligible outlets by outlet type.

- Column 4: 4(a) Report the number of eligible OTC outlets for which an inspection was completed, for each stratum.
 - 4(b) Report the numbers of eligible VM outlets for which an inspection was completed, for each stratum.
 - 4(c) Report the combined total of eligible OTC and VM outlets for which an inspection was completed, for each stratum.
- Column 5: 5(a) Report the number of OTC outlets found in violation of the law as a result of completed inspections, for each stratum.
 - 5(b) Report the number of VM outlets found in violation of the law as a result of completed inspections, for each stratum.
 - 5(c) Report the combined total of OTC and VM outlets found in violation of the law as a result of completed inspections, for each stratum.
- Totals: For each sub-column (a-c) in Columns 2-5, provide totals for the State as a whole in the last row of the table. These numbers will be the sum of the numbers in each row for the respective column.

FORM 1 (Required for all States not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data.)

				Sumr	nary of Sy	nar Inspe	ection Res	ults by St	ratum			ate:	
((1) (2)					(3)		(4)			(5)		
STRATUM			ER OF OUTI		ESTIMATED NUMBER OF ELIGIBLE OUTLETS IN POPULATION		ETS IN	NUMBER OF OUTLETS INSPECTED		NO. OF OUTLETS FOUND IN VIOLATION DURING INSPECTIONS		RING	
(a) Row #	(b) Stratum Name	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (2a+2b)	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (3a+3b)	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (4a+4b)	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (5a+5b)

RECORD COLUMN TOTALS ON LAST LINE (LAST PAGE ONLY IF MULTIPLE PAGES ARE NEEDED).

FORM 2 (Optional)

Appropriate for stratified simple or systematic random sampling designs.

Complete Form 2 to calculate the weighted RVR. This table (in Excel form) is designed to calculate the weighted RVR for stratified simple or systematic random sampling designs, accounting for ineligible outlets and non-complete inspections encountered during the annual Synar survey.

Instructions for Completing Form 2: In the top right hand corner of the form, provide the State name and reporting Federal fiscal year (FFY 2009).

- Column 1: Write in the name of each stratum into which the sample was divided. These should match the strata reported in Column 1(b) of Form 1.
- Column 2: Report the number of outlets in the sampling frame in each stratum. These numbers should match the numbers reported for the respective strata in Column 2(c) of Form 1.
- Column 3: Report the original sample size (the number of outlets originally selected, <u>including</u> substitutes or replacements) for each stratum.
- Column 4: Report the number of sample outlets in each stratum that were found to be eligible during the inspections. Note that this number must be less than or equal to the number reported in Column 3 for the respective strata.
- Column 5: Report the number of eligible outlets in each stratum for which an inspection was completed. Note that this number must be less than or equal to the number reported in Column 4. These numbers should match the numbers reported in Column 4(c) of Form 1 for the respective strata.
- Column 6: Report the number of eligible outlets inspected in each stratum that were found in violation. These numbers should match the numbers reported in Column 5(c) of Form 1 for the stratum.
- Column 7: Form 2 (in Excel form) will automatically calculate the stratum RVR for each stratum in this column. This is calculated by dividing the number of inspected eligible outlets found in violation (Column 6) by the number of inspected eligible outlets (Column 5). The State unweighted RVR will be shown in the Total row of Column 7.
- Column 8: Form 2 (in Excel form) will automatically calculate the estimated number of eligible outlets in the population for each stratum. This calculation is made by multiplying the number of outlets in the sampling frame (Column 2) times the number of eligible outlets (Column 4) divided by the original sample size (Column 3). Note that these numbers will be less than or equal to the numbers in Column 2.
- Column 9: Form 2 (in Excel form) will automatically calculate the relative stratum weight by dividing the estimated number of eligible outlets in the population for each stratum in Column 8 by the Total of the values in Column 8.
- Column 10: Form 2 (in Excel form) will automatically calculate each stratum's contribution to the State weighted RVR by multiplying the stratum RVR (Column 7) by the relative stratum weight (Column 9). The weighted RVR for the State will be shown in the Total row of Column 10.
- Column 11: Form 2 (in Excel form) automatically calculates the standard error of each stratum's RVR (Column 7). The standard error for the State weighted RVR will be shown in the Total row of Column 11.
- TOTAL: For Columns 2-6, Form 2 (in Excel form) provides totals for the State as a whole in the last row of the table. For Columns 7-11, it calculates the respective statistic for the State as a whole.

FORM 2 (Optional) Appropriate for stratified simple or systematic random sampling designs.

			Cal	culation of W	eighted Retail	er Violation	Rate			
									State:	
									FFY: 2009	
(1) Stratum Name	(2) N Number of Outlets in Sampling Frame	(3) n Original Sample Size	(4) n1 Number of Sample Outlets Found Eligible	(5) n2 Number of Outlets Inspected	(6) x Number of Outlets Found in Violation	(7) p=x/n2 Stratum Retailer Violation Rate	(8) N'=N(n1/n) Estimated Number of Eligible Outlets in Population	(9) w=N'/Total Column 8 Relative Stratum Weight	(10) pw Stratum Contribution to State Weighted RVR	(11) s.e. Standard Error of Stratum RVR
Total										

N - number of outlets in sampling frame

n - original sample size (number of outlets in the original sample)

n1 - number of sample outlets that were found to be eligible

n2 - number of eligible outlets that were inspected

x - number of inspected outlets that were found in violation

p - stratum retailer violation rate (p=x/n2)

N' - estimated number of eligible outlets in population (N'=N*n1/n)

w - relative stratum weight (w=N'/Total Column 8)

pw - stratum contribution to the weighted retailer violation rate

s.e. - standard error of the stratum RVR

FORM 3 (Required when a cluster design is used for all States not using the Synar Survey Estimation System (SSES) to analyze the Synar survey data.)

Complete Form 3 to report information about primary sampling units when a cluster design was used for the Synar survey.

Instructions for Completing Form 3: In the top right hand corner of the form, provide the State name and reporting Federal fiscal year (FFY 2009).

Provide information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

Column 1: Sequentially number each row.

Column 2: If stratification was used: Write in the name of stratum. All strata in the State must be

listed.

If no stratification was used: Write "State" in the first row to indicate that the whole

state constitutes a single stratum.

Column 3: Report the number of primary sampling units (PSUs) (i.e., first-stage clusters) created for

each stratum.

Column 4: Report the number of PSUs selected in the original sample for each stratum.

Column 5: Report the number of PSUs in the final sample for each stratum.

TOTALS: For Columns 3-5, provide totals for the State as a whole in the last row of the table.

	Summary of Clusters		npled State:	
			FFY: 2009	
(1) Row#	(2) Stratum Name	(3) Number of PSUs Created	(4) Number of PSUs Selected	(5) Number of PSUs in the Final Sample
	Total			

FORM 4 (Required for all States not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data)

Complete Form 4 to provide detailed tallies of ineligible sample outlets by reasons for ineligibility and detailed tallies of eligible sample outlets with noncomplete inspections by reasons for noncompletion.

Instructions for Completing Form 4:

In the top right hand corner of the form, provide the State name and reporting Federal fiscal year (FFY 2009).

Column 1(a): Enter the number of sample outlets found ineligible for inspection by reason for ineligibility. Provide the total number of ineligible outlets in the row marked "**Total.**"

Column 2(a): Enter the number of eligible sample outlets with noncomplete inspections by reason for noncompletion. Provide the total number of eligible outlets with noncomplete inspections in the row marked "**Total.**"

Inspection Tallies	by Reason	of Ineligibility or Noncompletion			
		State: FFY: 2009			
(4)		(2)			
(1) INELIGIBLE		(2) ELIGIBLE			
Reason for Ineligibility	(a) Counts	Reason for Noncompletion	(a) Counts		
Out of business		In operation but closed at time of visit			
Does not sell tobacco products		Unsafe to access			
Inaccessible by youth		Presence of police			
Private club or private residence		Youth inspector knows salesperson			
Temporary closure		Moved to new location			
Unlocatable		Drive thru only/youth inspector has no driver's license			
Wholesale only/Carton sale only		Tobacco out of stock			
Vending machine broken		Run out of time			
Duplicate		Other noncompletion reason(s) (Describe.)			
Other ineligibility reason(s) (Describe.)					
Total		Total			

FORM 5 (Required for all States not using the Synar Survey Estimation System (SSES) to analyze the Synar survey data)

Complete Form 5 to show the distribution of outlet inspection results by age and gender of the youth inspectors.

Instructions for Completing Form 5: In the top right hand corner of the form, provide the State name and reporting Federal fiscal year (FFY 2009).

Column 1: Enter the number of attempted buys by youth inspector age and gender.

Column 2: Enter the number of successful buys by youth inspector age and gender.

If the inspectors are age eligible but the gender of the inspector is unknown, include those inspections in the "OTHER" row. Calculate subtotals for males and females in rows marked SUBTOTALS. Sum SUBTOTALS for male, female, and OTHER and record in the bottom row marked TOTAL. Verify that that the TOTAL of attempted buys and successful buys equal the total for Column 4(c) and Column 5(c), respectively, on Form 1. If the totals do not match, please explain any discrepancies.

APPENDICES B & C: FORMS

Instructions

Appendix B (Sampling Design) and Appendix C (Inspection Protocol) are to reflect the State's CSAP-approved sampling design and inspection protocol. These appendices, therefore, should generally describe the design and protocol and are not to be modified with year-specific information. Please note that any changes to either appendix must receive CSAP's advance written approval. To facilitate the State's completion of this section, simply "cut and paste" the previously approved sampling design (Appendix B) and inspection protocol (Appendix C).

APPENDIX B: SYNAR SURVEY SAMPLING METHODOLOGY

				North Dakota 2009
1.	What type of sa	mpling f	rame is used?	
	List fraı	ne (Go te	o Question 2.)

17 Williams

The total number of outlets sampled varies from year to year, depending on number of outlets in the frame size and the prior year's RVR, for example.

b. Is clustering used within the stratified sample?

☐ **Yes** (Go to Question 8.)

 \boxtimes **No** (Go to Question 9.)

8. Provide the following information about clustering.

a. Provide a full description of how clusters are formed. (If multi-stage clusters are used, give definitions of clusters at each stage.)

b. Specify the sampling method (simple random, systematic, or probability proportional to size sampling) for each stage of sampling and describe how the method(s) is (are) implemented.

9. Provide the formulae for determining the effective, target, and original outlet sample sizes.

The SSES sample size calculator is used to estimate the sample size. The formula for calculating the effective sample size, n_e , is based on page 35 (formula S3.4) of the Sample Design Guidance. It is written as:

$$n_e = \frac{1}{\left(\frac{(0.0182)^2}{P(1-P)} + \frac{1}{N}\right)},$$

where P is the expected RVR. North Dakota uses a RVR value of 10%, and N is the outlet population (frame) size.

The target sample size is determined by multiplying the effective sample size by the design effect from the previous year's survey ($n_t = dn_e$).

The original sample size is determined by inflating the target sample size by the expected eligibility rate (r_l) and the expected completion rate (r_c) , where r_l is the eligibility (also known as accuracy) rate from the previous year's survey and r_c is the completion rate from the previous year's survey. The original sample size can be written as:

$$n_o = \frac{n_t}{r_l r_c} \,.$$

The original sample size has been inflated by a safety margin of 10%.

APPENDIX C: SYNAR SURVEY INSPECTION PROTOCOL

State: North Dakota

FFY: 2009 Note: Attach a copy of the inspection form and protocol used to record the inspection result. 1. How does the State Synar survey protocol address the following? a. Consummated buy attempts? Required Required Not Permitted Permitted under specified circumstances Not specified in protocol b. Youth inspectors to carry ID? ☐ Required Not Permitted Permitted under specified circumstances Not specified in protocol c. Adult inspectors to enter the outlet? Required Not Permitted Permitted under specified circumstances Not specified in protocol d. Youth inspectors to be compensated? Not Permitted Required Required Not specified in protocol Permitted under specified circumstances 2. Identify the agency(ies) or entity(ies) that actually conduct the random, unannounced **Synar inspections of tobacco outlets.** (Check all that apply.) Law enforcement agency(ies) State or local government agency(ies) other than law enforcement Private contractor(s) Other List the agency name(s): North Dakota Department of Human Services, Division of **Mental Health & Substance Abuse Services** 3. Are Synar inspections combined with law enforcement efforts (i.e., do law enforcement issue warnings or citations to retailers found in violation of the law at the time of the inspection)?

☐ Always ☐ Usually ☐ Sometimes ☐ Rarely ☐ Never

4.	Describe the methods used to recruit, select, and train youth inspectors and adult
	supervisors.

DMHSAS contracts with an agency to conduct the actual inspections. The contractor divides the state into "regions," as necessary, for surveying purposes and recruits adult supervisors and youth inspectors from each. Attempts are made to have an even number of male and female youth inspectors.

Each youth must complete a Youth Application form, as well as consent forms signed by their parent or guardian. Each youth inspector and adult supervisor must then attend a training session conducted by the contractor using protocol set forth by the State, which follows the training document developed by CSAP. The contractor must then submit proof to the State that each of the inspectors and supervisors attended a training session, usually in the form of a signed sign-in sheet from the day of the training.

5.			or procedural requirements instituted by the State to address ectors' immunity when conducting inspections?
	a.	Legal	☐ Yes ☐ No (If Yes, please describe.)
	b.	Procedural	☐ Yes ☐ No (If Yes, please describe.)
6.		e of the safety o	or procedural requirements instituted by the State to address of youth inspectors during all aspects of the Synar inspection
	a.	Legal	☐ Yes ☐ No (If Yes, please describe.)
	b.	Procedural	Yes No (If Yes, please describe.)
		check for safet	ors sometimes do enter the facility prior to the youth inspector to y of the location. Parents or guardians of youth inspectors must sign including medical, and all adult supervisors must have proof of ice.
7.	inspecti	•	gal or procedural requirements the State has regarding how onducted (e.g., age of youth inspector, time of inspections, ir)?
	a.	Legal	☐ Yes ☐ No (If Yes, please describe.)
	b.	Procedural	☐ Yes ☐ No (If Yes, please describe.)

APPENDIX D: LIST SAMPLING FRAME COVERAGE STUDY

(LIST FRAME ONLY)

	State: North Dakota FFY: 2009
1.	Calendar year of the coverage study:
2.	Percent coverage found:% (Provide calculation of the percent coverage.)
3.	Provide a description of the coverage study methods and results.
